About Me

I'm a Full Stack Developer with a passion for building responsive,user -friendly web applic ations.Skilled in HTML, CSS, JavaScript,React, Node.js, and MongoDB, I enjoy turning ideas into functional,clean code. Always learning and looking for new challen ges to grow and create impactful digital experiences.

Educational experience

Evangadi Network, full-stak developer

Udacity Full Stack Nanodegree

Google UX Design Certificate

Experience description

Designed and developed full-stack web applications using HTML, CSS, JavaScript, React, Node.js, and MongoDB.

Built responsive user interfaces with modern front-end frameworks like React and Tailwind CSS, ensuring mobile-first design.

Created and consumed RESTful APIs, handled user authentication (JWT), and managed databases for CRUD operations.

Collaborated closely with UI/UX designers to implement visually appealing layouts and improve user experience.

Deployed applications using platforms like Vercel, Netlify, and Firebase.

Used Git and GitHub for version control and worked in Agile environments with tools like Trello or Jira.

Optimized site performance, SEO, and loading speed to improve user engagement and retention.

Participated in code reviews, troubleshooting, and debugging across the stack to maintain high code quality.

Work Experience

Full Stack Developer – [Apple.com]

Designed and developed end-to-end web applications.

Collaborated with designers and product managers in Agile teams.

Improved page load times by 30% through code optimization.

Frontend Developer – [My Portfolio]

Created responsive UIs with React and Tailwind CSS.

Integrated RESTful APIs and maintained version control using Git.
